ADDITIONAL SKILLS:

- Agile Methodology: To develop a website, I follow agile methodology. That means first of all, I plan to do a website based on requirements, then I design the website, and then I start developing as per the design. In the meantime, I test the website myself, then deploy the website, and then I pass the website for review. At that moment, there will be some error, then I fix the error as well.
- Version Control System: To save my code, I use GitHub. I am an expert in working together as a team by using GitHub. I am also an expert in open-source version control systems.
